Using your tablet

Charging your tablet

For first-time use, you need to charge your tablet for four hours. After that you can recharge the battery as needed.

⚠️ Note: Charger illustration is for reference only. Actual configuration may vary.

Assembling the power adapter

Slide the plug fitting into the power adapter body until it clicks into place.

Connecting power

Connect the power connector to your tablet and plug the AC adapter side into any AC outlet.

⚠️ Note: It is normal for the tablet surface to become warm during charging or long periods of use.

⚠️ Warning: Only use the bundled power adapter to charge your device.
Turning on for the first time

To turn on your tablet, press and hold the power button until the tablet vibrates. Wait a moment for your tablet to boot up. You will then be asked some questions before you can use your tablet.

To start, tap to select your language and country, then tap **Start**. Follow the rest of the instructions as they are displayed.

![Welcome screen](image)

**Note:** If the tablet's screen turns off, it has entered sleep mode. Briefly press the power button to wake it up. For more information, see "Waking your tablet" on page 19.

Sign in to or create a Google account

If you have Internet access, your tablet allows you to synchronize information with a Google account.

During the start-up process, you may create or sign in to an account, which will be used to synchronize your contact list, email, calendar and other information. If you do not yet have Internet access, or do not want to use this feature, then tap **Skip**.

**Important:** You must sign in to a Google Account to use Gmail, Google Talk, Google Calendar, and other Google Apps; to download applications from Google Play; to back up your settings to Google servers; and to take advantage of other Google services on your tablet.

If you want to restore existing settings from another device with Android 2.0 (or later) installed, you must sign in to your Google account during setup. If you wait until after setup is complete, your settings will not be restored.

**Note:** If you have multiple Google accounts, such as separate accounts for personal and business contacts, you can access and synchonize them from the Accounts settings section. See "Multiple Google accounts" on page 40.

The **APPS** menu contains a list of shortcuts to applications you can drag to a Home screen.

⚠️ **Note:** Not all Widgets can be resized.

Data Usage

The Data Usage section shows how much data has been transmitted to your tablet, either in total or for each App. This information is useful if you are using a metered service.

Putting your tablet in Airplane mode

You can enter Airplane mode (also known as flight mode) to turn off network and Bluetooth functions and use your tablet during a flight. Check with your airline to make sure this is permitted onboard.

Switch your tablet off during takeoff and landing as it may interfere with aircraft electronic systems.

Uninstalling an application

You can remove programs installed on your tablet to free up extra storage memory. Tap and hold a program icon from the application menu and drag it into the Uninstall area in the top-left corner.

Note: You cannot uninstall applications that were pre-loaded on your tablet.

Alternatively, you can go to APPS > Settings and select Apps. Tap the application you wish to uninstall, tap Uninstall and confirm the uninstall.

Warning! You should only remove programs if you are familiar with the Android operating system.

Personal Synchronization

You can configure synchronization options for many applications on your tablet. You can also configure what types of data you synchronize for each account.

Some applications, such as People, Gmail, and Calendar, can sync data from multiple accounts. Others sync data only from the first Google Account you sign in to on your tablet, or from an account associated specifically with that application.

For some applications, such as People or Calendar, all changes that you make on your tablet are made to the synchronised copy on the Internet. Other applications only copy information from account on the Internet; the information on your tablet cannot be changed directly, you must change the information stored in the Internet account.

Tap APPS > Settings > [Account] to manage the synchronization of individual accounts.

Some applications, such as Gmail and Calendar, have additional synchronization settings. Open the application and tap the Menu button (three dots) and then tap Settings.
Multiple Google accounts

If you have multiple Google accounts, such as separate accounts for personal and business contacts, you can access and synchronize them from the Accounts settings section. Tap **APPS > Settings > Add account**.

Changing language and text options

Set your location and language input preferences by tapping **APPS > Settings > Language & input**.

System

Setting the date and time

To set the date and time, tap **APPS > Settings > Date & time**.

Tip: If you travel frequently or live in an area that uses daylight saving time, and have mobile network access, activate **Automatic date & time** from this menu. Your tablet will set the date and time based on information it receives from the network.

Setting alarms

There are two predefined alarms on your tablet by default. To add or edit alarm settings, tap **Clock** in the application menu and tap **Set alarm**.

Tap **Add alarm** to create a new alarm, or tap the check box next to a preset alarm to turn it on or off.

Tap a preset alarm to edit it. You can:

- Turn the alarm on or off.
- Set the alarm time.
- Set which days to repeat the alarm.
- Set a ringtone.
- Enable or disable vibrate.
- Give it a label (i.e., a name).

Updating your tablet’s operating system

Your tablet can download and install system updates, adding support for new devices or expanding software options.

To check for updates, tap **APPS > Settings > About tablet > System update > Check now**.

Note: Downloading new firmware can take up to 40 minutes, depending on your network speed. Do not press the power or reset button or access your tablet in any way during a system upgrade to prevent firmware installation failure.
Resetting your tablet

You may have to perform a reset if your tablet fails to respond when buttons are pressed or the screen is tapped. To reset your tablet use a small thin object (such as a paperclip) to press the recessed reset button next to the multi-function connector.

Clean boot

A clean boot will restore your tablet to the factory settings.

⚠️ Warning! This will erase all your personal information, any contacts stored on your tablet and any programs you installed.

Open Settings from the application menu, then tap Backup & reset > Factory data reset; click Reset tablet and then Erase everything to format your tablet.
