

Your HTC Desire 820 dual sim

Inserting your nano SIM and microSD cards

IMPORTANT: USE A STANDARD NANO SIM ONLY.

Don't cut a micro SIM or regular SIM card and insert it into the nano SIM slot. It's thicker than the standard nano SIM card and may get stuck in the slot.

1. Make sure your phone is off and is facing down. Open the slot cover with your thumb or finger.
2. The two upper slots are nano SIM slots with trays. To remove the tray from each slot, insert your fingertip in the small opening in the slot and then pull the tray out.
3. Make sure the nano SIM trays are facing up. Place your nano SIM cards into the trays with the gold contacts facing up and the cut-off corner facing out.

You can insert a 4G LTE or 3G nano SIM card in either slot. When you have two cards inserted, only one card can connect to the 4G/3G network. The other card will connect to the 2G network only.

SIM 1 connects to the 4G/3G network by default. You can also set which card connects to 4G/3G. For details, see the user guide.

4. To reinsert the nano SIM trays, center them first in their respective slots, and then slide them in until they lock into place.

5. With your microSD™ card's gold contacts facing up, insert the microSD card into the bottom slot until it clicks into place.

6. To close the slot cover, slide the plastic hinge into the side and press the cover until it clicks into place.

Want some guidance on using your phone?

On your phone, check out our friendly walkthroughs in the **Tips & Help** app. For self-help in troubleshooting basic problems, you can use the **HTC Guide** app. Or go to www.htc.com/support/ to find tutorials, the user guide, FAQs, latest news, and more.
