- Your tablet device cannot connect to a Wi-Fi network.

Read This First

This Help guide is for Android version 4.0.3 (release6).

Congratulations on your purchase of a Xperia(TM) Tablet S.

Before you start using your tablet device, read the supplied Important Information (safety instructions). This Help guide explains how to operate your tablet device and apps. You can download the Help guide (PDF file) to the tablet device [\[Details\]](#).

Charging the battery

The battery charge level may be low when you purchase your tablet device. Charge the battery before you start using your tablet device [\[Details\]](#).

About software (Android version) updates

When you update the software (Android version), be sure to install the latest version of each app. Otherwise, some apps may not start. To find a newer version of apps, check Play Store [\[Details\]](#).

About Google account

Having a Google account enables you to use Google services such as Google Play Store (free registration).

Using a Google account, you can sync Google services you use on your computer, or other devices with apps on the tablet device such as mail, calendar and user applications [\[Details\]](#).

Note

- Some models are not available in some countries/regions.

Downloading the Help guide

You can download the PDF Help guide to your tablet device.

Install the Reader by Sony app or another PDF reader app to view the PDF file on your tablet device.

1. Tap “Download Help guide (PDF file)” from the top page of the Help guide.
2. After downloading the Help guide has finished and  appears on the status bar at the bottom right of the screen, tap the status bar.

The notification panel is displayed.

3. Tap “helpguide_pdf.pdf.”
Select and tap an application with which to view the PDF file, and the Help guide will be displayed.

Hint

- You can also display the Help guide by tapping [ Apps & Widgets] - [ Downloads] and selecting “helpguide_pdf.pdf.”

Turning On or Shutting Down Your Tablet Device

Turning on your tablet device

1. Charge the tablet device.
2. Press and hold the power button for three seconds.
When you use the tablet device for the first time, set up the tablet device by following the on-screen instructions.

Note

- In the default setting, if you do not operate the tablet device for a certain period of time, the screen turns off and becomes locked. Press the power button again to display the screen, and then unlock it.

Shutting down your tablet device

It is recommended that you turn off (shut down) the tablet device if you will not use it for a long time.

1. Press and hold the power button until a confirmation screen appears.
2. Tap [OK].
The tablet device will automatically turn off in a few seconds.

Note

- If you turn off the tablet device while downloading or transferring data, that data may be damaged.
- If you cannot shut down your tablet device, please reset it.

[Setting the Time that Elapses Before the Screen Turns Off \(Goes to Sleep\)](#)

[Resetting Your Tablet Device](#)

Turning the Screen On/Off (Sleep Mode)

In the default setting, if you do not operate the tablet device for a certain period of time, the screen turns off and becomes locked. To turn on the screen, press the power button to display the screen, and then unlock it.

When you are not using the tablet device, you can turn off the screen (switch to sleep mode) manually.

1. Press the power button.

The screen goes to sleep. The power is not completely turned off. To deactivate sleep mode and turn on the screen, press the power button again, then unlock the screen.

Hint

- You can change the time that elapses before the screen turns off (goes to sleep). You can prevent the screen from becoming locked and also change the pattern for the screen lock.

Related Topic

[Setting the Time that Elapses Before the Screen Turns Off \(Goes to Sleep\)](#)

[Configuring to Lock the Screen](#)

Setting the Time that Elapses Before the Screen Turns Off (Goes to Sleep)

In the default setting, the screen automatically goes to sleep if the tablet device has not been operated for a certain period. You can change the time that elapses before the screen turns off.

1. Tap [☰] Apps & Widgets] - [⚙️ Settings] - [Display] - [Sleep].
2. Select and tap the time that elapses before your tablet device goes to sleep.

Hint

- You can set the screen to not turn off even after the set time elapses only when charging. Tap [☰] Apps & Widgets] - [⚙️ Settings] - [Developer options], and then add a check mark on [Stay awake].

Related Topic

[Changing the Settings](#)

Notes on Using the AC Adapter

- Use the AC adapter supplied with your tablet device or a genuine Sony AC adapter. Do not use any other AC adapter as it may cause malfunctions.
- Do not connect the AC adapter to a power conversion device such as a travel power converter. Doing so may cause overheating or a malfunction.
- Do not use a damaged AC power cord (mains lead)* or USB cable for Multi Port to connect your tablet device with the AC adapter.

* You do not need an AC power cord (mains lead) in some countries.

Related Topic

[Notes on Charging](#)

Charging the Battery

The battery charges while your tablet device is plugged in. Charging time will vary depending on how you use your tablet device.

1. Plug the supplied USB cable for Multi Port into the AC adapter.
2. Plug an AC power cord (mains lead) into the AC adapter.

Note

- AC power cord (mains lead) is not supplied in some countries/regions.

3. Plug the AC adapter or an AC power cord (mains lead) to the AC outlet (wall socket).
4. Turn over your tablet device, and then remove the cover for the Multi Port.

Note

- The Multi Port cover is necessary to utilize the splash-proof feature. Keep the Multi Port cover in a safe place.

5. Plug the USB cable for Multi Port into the Multi Port of your tablet device in the direction shown below. The charge indicator shows the battery charging status.

Hint

- Using the designated Sony cradle (SGPDS2, sold separately) for your tablet device allows you to charge the battery easier.

Checking the remaining battery level/charging status

You can check the remaining battery level with the icon displayed on the status bar on the Home screen.

The charge indicator tells you the charging status. The charge indicator lights up in different colors, depending on the remaining battery level.

Charging status	Remaining battery level	Display status
With the AC adapter	Low (0 - 15 %)	Red
	Mid (16 - 89 %)	Orange
	Full (90 - 100 %)	Green
	Low (0 - 15 %)	Red flashing

Without the AC adapter	Mid (16 - 89 %)	Off
	Full (90 - 100 %)	Off

Note

- The charge indicator flashes in red when the battery level becomes low and the tablet device requires charging to continue operation.

Related Topic[Parts and Controls](#)[Specifications](#)[Confirming Download or Update Information on the Status Bar](#)[Notes on Using the AC Adapter](#)[Notes on Charging](#)

Notes on Charging

Charging the battery

- For your safety, use only the supplied AC power cord (mains lead)* to charge the battery.
- Performance and safety are not guaranteed if you charge using anything other than the USB cable and AC adapter designed for the tablet device or a designated Sony AC adapter.
- Depending on the ambient temperature or how you use your tablet device, the battery may not charge or it may take a long time to charge the battery.
- Do not charge the battery near fire or in direct sunlight.
- The tablet device is not fully charged when shipped.
- Heat builds up in the battery while it is in use or being charged. This is normal and is not cause concern. If your tablet device or the AC adapter becomes abnormally hot, shut down your tablet device and stop using the AC adapter and tablet device.
- You may not be able to charge the battery depending on the computer used or the connector of the USB compatible device.
- You may not be able to charge the tablet device depending on the USB jack of the computer or USB device.

* You do not need an AC power cord (mains lead) in some countries.

Battery discharge

- After charging, the battery gradually loses its charge even if it is not used. If it is left unused for a long time, the battery charge may be depleted. We recommend recharging the battery before use.
- If you do not use your tablet device for an extended period of time, fully charge the battery every six months.

Battery life

- Battery life varies depending on usage, settings, and temperatures.

Battery deterioration

- Battery capacity gradually declines through repeated recharging and discharging. As a result, the battery life may become short or the battery may not perform optimally even when fully charged.

Touch Screen Operations

Tap

Selects an icon or option.

Tapping quickly twice allows you to zoom in or out on images or other on-screen items.

Tap & hold

Opens an option menu.

Drag

Moves an item or scrolls a page slowly.

Flick

Scrolls a page quickly.

Pinch

Zooms in or out.

Related Topic

[Notes on the Screen](#)

Notes on the Screen

Notes on the touch screen

- Your tablet device uses a capacitive touch screen. Tap the screen directly with your fingertip. Do not scratch it or tap it with a sharp object such as a needle, pen, or fingernails. You cannot operate the touch screen with a stylus.
- If you tap the touch screen with gloved fingers, the touch screen may operate incorrectly or may not operate at all.
- Do not operate your tablet device with objects on the touch screen.
- If the touch screen is touched by anything other than your fingertip, it may not react correctly.
- Do not put the touch screen close to other electrical devices. Electrostatic discharges may cause the touch screen to malfunction.
- If there are water droplets on the touch screen, or if you touch it with wet fingertips, the touch screen may not react correctly.
- Do not put the touch screen in humid places. The touch screen may malfunction in humid conditions or when exposed to water.

Notes on the LCD screen

- Do not leave the LCD screen facing the sun. Be sure to block direct sunlight when using your tablet device near a window.
- Using your tablet device in low temperature conditions may produce a residual image on the LCD screen. This does not indicate a malfunction. The screen will return to normal when the tablet device returns to normal temperature.
- The LCD screen may become warm during operation. This is normal and does not indicate a malfunction.
- The LCD screen is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) on the LCD screen. This is a normal result of the manufacturing process and does not indicate a malfunction.
- The LCD screen is made of glass. If the glass is damaged (cracked, etc.), do not touch the touch screen or try to repair it yourself. Handle the LCD screen carefully as it is vulnerable to damage from dropping or mechanical shock. We cannot provide warranty for any damages caused by customers due to incorrect handling.

Turning On/Off the Wi-Fi Function

To download apps or enjoy Internet content, connect the tablet device to a Wi-Fi network (access point). To set the Wi-Fi connection, turn on the Wi-Fi function of the tablet device.

To turn on the Wi-Fi function

1. Tap  Apps & Widgets] - [ Settings] - [Wi-Fi].
2. Set [Wi-Fi] to [ON].

Note

- The Wi-Fi antenna is built in to your tablet device. If you cover the antenna with your hands or other objects while connected to the Internet using the Wi-Fi function, the communications quality may deteriorate.

To turn off the Wi-Fi function

When you are not using Internet, you can save power by turning off the Wi-Fi function.

1. Tap  Apps & Widgets] - [ Settings] - [Wi-Fi].
2. Set [Wi-Fi] to [OFF].

Hint

- To disconnect the Wi-Fi function temporarily in an area where Wi-Fi communications is restricted, turn on [Airplane mode] on the control panel displayed from the status bar.
- The screen of your tablet device will be off (in sleep mode) when apps are running, such as when the music player app is playing back content, but the tablet device will still be operating. You can choose whether to keep the Wi-Fi connection active or not when the screen is off (in sleep mode).
Tap  (Option menu) - [Advanced] - [Wi-Fi disconnect policy], and then select the desired item on the [Wi-Fi disconnect policy] screen.

Note

- Regardless of the setting in [Wi-Fi disconnect policy], the Wi-Fi connection is disconnected if no app is running during sleep mode. The Internet connection will initially be off when the screen turns on after being off (deactivating sleep mode), but the tablet device will then connect to the Internet automatically.

[Notes on Holding Your Tablet Device](#)

Connecting to Wi-Fi

Set the Wi-Fi connection on the tablet device to connect to the Internet. Connect the tablet device to the Wi-Fi router (access point) in a manner suitable for the situation: at home or the office or using a public wireless service, etc.

1. Tap [ Apps & Widgets] - [ Settings] - [Wi-Fi].

Detected Wi-Fi networks are listed on the right side of the screen.

Display on the screen	Description
1 Network SSID	The name of a wireless network.
2 Security	The security protocol of the Wi-Fi router.
3 Security availability	When using a security-enabled Wi-Fi router, the lock icon will appear at the bottom right of the icon.

2. Configure the Wi-Fi setting in one of the following ways.

- Establish a connection by pressing the WPS button on the Wi-Fi router:
If you use a Wi-Fi router compatible with WPS, press the WPS button, and the connection settings and security settings will be configured automatically.
- Connect from the Wi-Fi network list:
If you are at home or using a public wireless service, connect the tablet device to a network available from the Wi-Fi network list.

Hint

- If no network is displayed in step 1, tap [SCAN] on the top right of the screen.
- If the Wi-Fi function is turned on where a Wi-Fi network connection is available, the tablet device will automatically reconnect if it had made a connection to that network previously.

Note

- Any communications and connection charges that apply for the use of the Wi-Fi router are the responsibility of the customer.
- For details on the network SSID and security format, refer to the operating instructions supplied with the Wi-Fi router.
- When connecting to a public wireless service, refer to the provider's website, etc. for instructions.

[Notes on Holding Your Tablet Device](#)

Connecting by Pressing the WPS Button on the Wi-Fi Router

If you use a Wi-Fi router compatible with WPS, press the WPS button to automatically configure the connection settings and security settings.

1. Tap [⋮ Apps & Widgets] - [🔧 Settings] - [Wi-Fi].
2. Tap the network to connect to from those on the Wi-Fi network list.
3. Tap [Show advanced options].

A check mark is put in the box.

4. Tap  on the bottom left of the screen.
The keyboard disappears.
5. Tap [Off] for [WPS], and then tap [Push button].

6. Press the WPS button on the Wi-Fi router (access point).
The Wi-Fi settings of the tablet device are automatically configured.

Hint

- For details on how to use the WPS button, refer to the operating instructions supplied with the Wi-Fi

router.

7. Tap [Connect] on the tablet device.

When a connection is established, [Connected] appears under the SSID of the network the tablet device is connected to.

Hint

- When the tablet device connects using Wi-Fi, the Wi-Fi icon is displayed on the status bar at the bottom right of the screen.

[Notes on Using the Wi-Fi Function](#)

[Checking the Wi-Fi Connection](#)

Connecting from the Wi-Fi Network List

If you are at home or using a public wireless service, connect the tablet device to an available network on the Wi-Fi network list. Some Wi-Fi routers (access points) require you to enter a password.

1. Tap [⋮ Apps & Widgets] - [🔧 Settings] - [Wi-Fi].
2. Tap the network to connect to from those on the Wi-Fi network list.
3. Enter the password if required.

Hint

- You can check the password you entered by tapping [Show password].
 - Some Wi-Fi routers call a password a “PIN CODE,” “WEP key,” “KEY,” etc.
4. Tap [Connect].
- When a connection is established, [Connected] appears under the SSID of the network the tablet device is connected to.

Hint

- When the tablet device connects using Wi-Fi, the Wi-Fi icon is displayed on the status bar at the bottom right of the screen.
- For proxy and IP settings, tap [Show advanced options] in step 4.

Note

- When connecting to a public wireless service, you are sometimes required to enter a user name and password in the browser. For details, refer to the provider's website.

[Connecting to Wi-Fi](#)

[Connecting by Pressing the WPS Button on the Wi-Fi Router](#)

[Confirming Download or Update Information on the Status Bar](#)

[Notes on Using the Wi-Fi Function](#)

[Checking the Wi-Fi Connection](#)

Notes on Using the Wi-Fi Function

- Use of Wi-Fi devices may be restricted by local regulations in some countries or regions.
- Wi-Fi devices work on the 2.4 GHz band, which is used by a variety of devices. Wi-Fi devices therefore use technology to minimize radio interference from other devices that use the same band. However, radio interference may still cause slower data transfer speeds, reduce communications range or cause communications failure.
- If both the Bluetooth function and the 2.4 GHz Wi-Fi function of your tablet device are enabled, interference may occur and cause slower data transfer speeds or other problems.
- To communicate via Wi-Fi while traveling, you may need to contract with a Wi-Fi connection service provider.
- Data transfer speed and communications range may vary depending on the following conditions:
 - Distance between devices
 - Presence of obstacles between devices
 - Device configuration
 - Signal conditions
 - Surrounding environment (wall material, etc.)
 - Software in use
- Communications failure may occur in some signal conditions.
- The data transfer rate noted in the specifications is the theoretical maximum, and it may not reflect actual data transfer rate.
- Actual data transfer speed may not be as fast as the speed displayed on your tablet device.
- Communications is not available between the 2.4 GHz and 5 GHz Wi-Fi frequency bands.
- The data transfer rate for IEEE 802.11g and IEEE 802.11n (2.4 GHz) devices may be affected by interference when those protocols are used with IEEE 802.11b products. Also, products using IEEE 802.11g and IEEE 802.11n automatically lower the transfer rate to maintain compatibility with IEEE 802.11b products.
- When the data transfer speed is not as fast as expected, changing the wireless channel on the Wi-Fi router may increase the speed.
- Only use Wi-Fi indoors when using it with IEEE 802.11a/n (5 GHz).

[Specifications](#)

Turning On/Off the Bluetooth Function

You can establish wireless connections and communications between your tablet device and other Bluetooth devices such as a computer, mobile phone, headset, headphones or wireless keyboard. Data can be transferred between these devices without cables at a range of up to 33 feet / 10 meters in an open area.

To turn on the Bluetooth function

Turn on the Bluetooth function when pairing or connecting with a Bluetooth device.

1. Tap  Apps & Widgets] - [ Settings] - [Bluetooth].
2. Set [Bluetooth] to [ON].

Hint

- When the Bluetooth function is turned on, the Bluetooth icon is displayed on the status bar at the bottom right of the screen.

Note

- The Bluetooth antenna is built in to your tablet device. If you cover the antenna with your hands or other objects while using the Bluetooth function, the communications quality may deteriorate.

To turn off the Bluetooth function

To reduce battery consumption, turn off the Bluetooth function when not in use.

1. Tap  Apps & Widgets] - [ Settings] - [Bluetooth].
2. Set [Bluetooth] to [OFF].

Related Topic

[Notes on Holding Your Tablet Device](#)

Pairing with a Bluetooth Device

To connect with a Bluetooth device, pair the tablet device and Bluetooth device. Once you pair them, your tablet device automatically connects to the Bluetooth device by just turning on both devices the next time.

1. Make sure the setting of the Bluetooth device pairing with the tablet device is in a detectable mode.
2. Tap  Apps & Widgets] - [ Settings] - [Bluetooth].
3. Tap [SEARCH FOR DEVICES] at the top right of the screen.
The [AVAILABLE DEVICES] list is displayed.
4. Tap the name of the device you want to connect to.
5. Tap [Pair], and enter the device passkey (e.g. 0000) if necessary to connect to the Bluetooth device.

Hint

- To make the Bluetooth device settings detectable, refer to the operating instructions supplied with the Bluetooth device.
- To set the tablet device so that it can be detected by the Bluetooth device, tap the model name of your tablet device in the list displayed on the right side of the screen in step 3.
- To connect to the paired device again, tap the device name in the [Paired devices] list.

To unpair a device

You can unpair paired devices from the tablet device.

1. Tap  of the device you want to unpair from your tablet device in the [Paired devices] list.
2. Tap [Unpair].

Related Topic

[Turning On/Off the Bluetooth Function](#)

[Notes on Using the Bluetooth Function](#)

Notes on Using the Bluetooth Function

- Use of Bluetooth function may be restricted by local regulations in some countries or regions.
- The Bluetooth function may not work with some devices, depending on the manufacturer or the software version employed by the manufacturer. Check the system requirements of the Bluetooth device before purchasing.
Some Bluetooth devices require authentication (pairing) before establishing a connection with another device. Perform the authentication process before connecting to such a device.
- Bluetooth devices work on the 2.4 GHz band, which is used by a variety of devices. Bluetooth devices use technology to minimize radio interference from other devices that use the same band. However, radio interference may still cause slower data transfer speeds, reduce communications range or cause communications failure.
- Data transfer speed and communications range may vary depending on the following conditions:
 - Distance between communicating devices
 - Presence of obstacles between devices
 - Surrounding environment (wall material, etc.)
 - Device configuration
 - Software in use
 - Signal conditions
- Communications failure may occur in some signal conditions.
- Interference may occur if both the Bluetooth function and the 2.4 GHz Wi-Fi function are enabled. That will result in slower data transfer speeds or other problems.
- Large files may occasionally be corrupted during continuous transfer due to limitations of the Bluetooth standard and due to signal conditions.
- Connecting multiple Bluetooth devices to your tablet device may cause channel congestion, resulting in poor device performance. This is normal with Bluetooth technology and does not indicate a malfunction.
- Video and audio may not be synchronized if you play videos on your tablet device with audio output from a connected Bluetooth device. This is a frequent occurrence with Bluetooth technology and does not indicate a malfunction.
- All Bluetooth devices must be certified through procedures stipulated by Bluetooth SIG to ensure that they comply with the Bluetooth standard. Even if the Bluetooth standard is complied with, operation procedures may differ or you may not be able to transfer data depending on characteristics and specifications of the individual device.
- Output sound may not be switched between a Bluetooth audio device and the built-in speaker when you connect or disconnect the device while an app such as game is running. If that occurs, exit the app and restart the device. You can avoid this problem by switching the sound before starting the app.
- Sound of apps such as games may be delayed when heard from Bluetooth audio devices connected to your tablet device. If that occurs, output sound from the built-in speaker or connect an audio device to the headphone jack of your tablet device to hear the sound.
- If you turn off a Bluetooth audio device connected to your tablet device while an app such as a game is running, the app may no longer work properly. If that occurs, exit the app and restart your tablet device.

Bluetooth security

Bluetooth wireless technology has an authentication function that allows you to determine with whom you choose

to communicate. With the authentication function, you can prevent any anonymous Bluetooth devices from accessing your tablet device. The first time two Bluetooth devices communicate, a common passkey (a password required for authentication) should be determined for both devices to be registered. Once a device is registered, there is no need to re-enter the passkey.

Your tablet device will be detected by other Bluetooth devices only when it is set to allow detection by such devices. You can set how long your tablet device is detectable or whether or not to allow reception after a connection is established.

Inserting/Removing a SIM Card (SGPT13)

To insert a SIM card

1. Make sure all the cables are unplugged from your tablet device, and then shut down the tablet device.
2. Open the SIM card cover.

3. Insert a pin or small paper clip (not supplied) into the SIM card eject hole.

Hint

- When you purchase your tablet device, a label is attached to the SIM tray. Pull the label to pull out the SIM tray. Remove the label when you insert the SIM card.

4. Eject the SIM tray.

Note

- Make sure to handle the SIM tray gently.

5. Place a SIM card on the SIM tray so that the cutout of the SIM card fits that of the SIM tray.

Note

- Make sure there are no protrusions on the cutting surface after detaching the SIM card from its plastic package. Protrusions will prevent the SIM card from fitting in the SIM tray.

6. Insert the SIM tray.

Note

- Make sure not to insert the SIM tray in the reverse direction.

To remove a SIM card

1. Follow the procedures up to step 4 of “To insert a SIM card,” then remove the SIM card from the tray.

[Turning On or Shutting Down Your Tablet Device](#)

[Setting Up an Access Point \(SGPT13\)](#)

[Notes on the SIM Card \(SGPT13\)](#)

Notes on the SIM Card (SGPT13)

- Make sure the power of your tablet device is turned off before inserting or removing the SIM card.
- Do not press the SIM card more than necessary when inserting or removing a SIM card.
- If you remove the SIM card right after using your tablet device, the SIM card may be warm. This is normal and does not indicate a malfunction.
- Avoid exposing the SIM card to very cold, hot, or humid places.
- Do not touch the contacts or terminals with your fingers or metal objects. If dirty, wipe the card with a soft cloth and keep it clean.
- Do not drop, press, or bend the SIM card.
- Do not insert the SIM card with labels or stickers in place.
- Xperia(TM) Tablet S does not support the use of mini-UICC SIM cards (micro-SIM cards). Using a micro-SIM card or one with an adapter may damage the SIM card slot.

Setting Up an Access Point (SGPT13)

To confirm the current access point

1. Tap  Apps & Widgets] -  Settings] - [More...] - [Mobile networks] - [Access Point Names].

To add an access point

1. Tap  Apps & Widgets] -  Settings] - [More...] - [Mobile networks] - [Access Point Names].
2. Tap  (Option menu) - [New APN].
3. Tap [Name], and enter the profile name of the network you want to add.
4. Tap [APN], and enter an access point name.
5. Enter all the items required by the carrier.
6. Tap .

The settings are saved.

To reset the access point

1. Tap  Apps & Widgets] -  Settings] - [More...] - [Mobile networks] - [Access Point Names].
2. Tap  (Option menu) - [Reset to default].

[Inserting/Removing a SIM Card \(SGPT13\)](#)

Using Location Services

You can enable apps to use location information using GPS satellites or wireless networks. That enables you to search your present location and routes to a destination.

Enabling location information

1. Tap [ Apps & Widgets] - [ Settings] - [Location services].
2. To enable reception of location information via wireless communications, tap [Google's location service]. To enable reception of location information via GPS satellites, tap [GPS satellites].
A check mark is put in the box for that setting.

Disabling location information

1. Tap [ Apps & Widgets] - [ Settings] - [Location services].
2. Tap [Google's location service] or [GPS satellites].
The check mark is removed from the box for that setting, and location information is disabled.

Hint

- The GPS (Global Positioning System) function provides location information by receiving signals from GPS satellites. You can see the location where you are with your tablet device by using an app that supports the GPS function.

Note

- The GPS antenna is built in to your tablet device. If you cover the antenna with your hands or other objects while using the GPS function, the positioning accuracy may deteriorate.

Related Topic

[Notes on GPS Function](#)

[Notes on Holding Your Tablet Device](#)

Notes on GPS Function

- Move your tablet device as little as possible in an area with a clear view of the sky until the present location is displayed by the GPS function. The present location can be displayed quicker when stationary than while moving. If the present location is not displayed or if the wrong location is displayed, move to an area with a clear view of the sky.
- Direction may not be measured correctly due to the surrounding environment.
- When other electronic devices are near your tablet device, electromagnetic waves or magnetic interference from those may prevent your tablet device from providing accurate location information. Keep electronic devices away from your tablet device.
- When your tablet device is in an area with poor reception of GPS signals, you may encounter positioning errors. To receive more accurate information, avoid using your tablet device in the following locations.
 - Inside buildings or vehicles
 - In tunnels or underground
 - Under elevated tracks
 - Between tall buildings
 - In dense trees
 - In valleys

Inserting/Removing an SD Memory Card

Your tablet device is equipped with an SD memory card slot. You can use this slot to transfer data to and from digital cameras, camcorders, music players, and other audio/video devices.

To insert an SD memory card

1. Open the cover of the SD memory card slot.
2. Locate the SD memory card slot.
3. Hold the SD memory card with the contacts facing down and the arrow pointing toward the SD memory card slot.

4. Carefully slide the SD memory card into the slot until it clicks into place.

Note

- Be careful not to insert an SD memory card at the wrong orientation. If you force it into the slot upside down, the slot may be damaged. For details, refer to the manual of the SD memory card.

To remove an SD memory card

1. Make sure files are not being transferred.
2. Locate the SD memory card slot.
3. Push in the SD memory card all the way and release.
The SD memory card is ejected.
4. Hold the SD memory card, and pull it out of the slot.

Related Topic

[Compatibility of SD Memory Cards](#)

[Notes on SD Memory Cards](#)

[Importing/Exporting Contents from an SD Memory Card](#)

Notes on SD Memory Cards

- Keep away from infants. SD memory cards are harmful if swallowed.
- Do not touch the contacts with fingers or metal objects.
- SD memory cards contain delicate electronic components. Do not subject them to excessive force, bend or drop them.
- Do not disassemble or modify.
- Avoid moisture.
- Do not use or store in the following locations:
 - Places with high temperature, such as inside a closed car in the sunshine
 - Places exposed to direct sunlight
 - Humid or corrosive environments
 - Excessively dusty places
- Be sure to use SD memory cards that are compliant with the standards supported by your tablet device. A card of the wrong size may become jammed in the slot, causing damage to your tablet device.
- You cannot write data to an SD memory card that is write-protected.
- It is recommended that you make a backup copy of important data.
- To avoid losing stored data, keep SD memory cards away from static electricity or electrical noise that may interfere with the card.
- When carrying SD memory cards, be sure to put them in their case to avoid static electricity damage.
- Before using an SD memory card with a device other than a tablet device, such as a digital camera or a portable audio player, format (initialize) the SD memory card using that device.

Some devices may not support the file format for tablet devices and show you a message that recommends you to format the card. If you encounter such a message, copy data from the card to your tablet device (or to other devices via the network) and format the card using a device other than the tablet. Note that formatting a card will delete all current data contained on it. For more details, refer to the manual of the device you are using.
- Do not insert foreign objects into the SD memory card slot.
- The SD memory card slot can be used for reading/writing supported cards only, and it cannot be used for other purposes.

Compatibility of SD Memory Cards

SD memory cards (up to 2 GB), SDHC memory cards (up to 32 GB), and SDHC UHS-I memory cards (up to 32 GB) available as of August 2012 have been tested and found compatible with your tablet device.

However, this does not guarantee that all SD memory cards, SDHC memory cards, or SDHC UHS-I memory cards will be compatible with your tablet device.

Connecting a USB Compatible Device

Your tablet device can be connected to a USB device by using the Multi Port of the tablet device.

1. Turn over your tablet device, and then remove the cover for Multi Port.
2. Connect a USB device to your tablet device using a designated USB host adapter cable (SGPUC3, sold separately) and a commercially available USB cable.

1. Commercially available USB cable
2. Designated USB host adapter cable (SGPUC3, sold separately)

Hint

- Your tablet device supplies up to 500 mA of power to a connected USB device.

Note

- Do not turn off your tablet device while reading and writing data via USB.
- Do not disconnect the cable while writing and reading data. Doing so may result in loss of that data.

Checking the Supplied Items

- USB Cable for Multi Port
- AC adapter
- AC power cord (mains lead) (not supplied in some countries/regions)
- Quick Setup Guide
- Important Information

Notes on Holding Your Tablet Device

- Some apps may not support screen rotation. Some apps may rotate the screen in reverse.
- Be careful not to hold or cover the antennas shown in the figure below while using the Wi-Fi, Bluetooth, GPS, or mobile communications functions.

SGPT12

1. Wi-Fi / Bluetooth / GPS

SGPT13

1. Wi-Fi / Bluetooth / GPS
2. Mobile communications

- Do not put your fingernails in the accessory attachment slot or in the groove (shown below) when holding the tablet device.

Note

- Some models are not available in some countries/regions.

Resetting Your Tablet Device

If your tablet device is not performing as expected, press and hold the power button for about 10 seconds.

Note

- Resetting the tablet device does not revert the settings to factory default, but unsaved data or settings may be lost.
- Reset the tablet device only when you cannot turn it off.

Reverting to Factory Default (Initializing Data)

By reverting the tablet device factory default, all installed apps and settings will be deleted to give you a “clean” tablet.

1. Tap [ Apps & Widgets] - [ Settings] - [Backup & reset] - [Factory data reset].
2. Tap [Reset tablet] at the bottom of the menu on the right.
All data is initialized and the tablet device automatically restarts.

Note

- It is recommended that you make a backup copy before deleting data in the internal memory [\[Details\]](#).
- All data in the data storage area is deleted, including the Google account information, the system data and settings, and any application data you have downloaded.
- It is recommended that you make a backup copy of important data because the user data cannot be restored once deleted.

Notes on Using Voice Communications Apps (SGPT13)

- When you attempt to use Internet telephone or voice chat over mobile network, you may not be able to establish a connection. Use Wi-Fi instead.

Notes on Use

Cover

- Close the SD memory card slot cover securely.
- Do not open/close the Multi Port cover when using the tablet device outdoors or with wet, sweaty, or sand-covered hands. Getting water or sand inside the tablet device may cause malfunctions.
- Keep the Multi Port cover out of reach of small children to prevent it from being accidentally swallowed.
- The tablet device has a splash-proof feature*¹ equivalent to IPX4 (Protected against water splashing from any direction) of IEC 60529 (Degrees of protection provided by enclosures (IP code)) but is not completely waterproof. Do not use the tablet device in water or splash a lot of water on the tablet device. If used improperly, water may get inside the tablet device and cause fire, electric shock or malfunctions [\[Details\]](#).

*1 The splash-proof feature applies to pure water and tap water. The splash-proof feature works with your tablet device on a stand, such as Sony Tablet Stand (SGPDS4, sold separately, not available in some countries/regions) and with all covers closed completely.

Caring for your tablet device

- Clean the cabinet with a soft, dry cloth or one slightly moistened with a mild detergent solution. Do not use a detergent solution for cleaning the touch screen. Do not use an abrasive pad, scouring powder, or solvent such as alcohol or benzine, as these may damage the finish of your tablet device.
- If your tablet device is exposed to moisture such as rain or extreme humidity, wipe your tablet device with a soft dry cloth. Do not dry with an oven or dryer.
- Clean the lens of the built-in camera with a blower brush or a soft brush. If the lens is extremely dirty, wipe it off with a soft dry cloth. Do not rub the lens, as it is sensitive to pressure.

Usage environment

- Do not use or leave the tablet device where the temperature is extremely high (about 35 °C (95 °F) or higher) or low (about 5 °C (41 °F) or lower), or in a humid place such as a bathroom or sauna. If you use or leave the tablet device out of the range stated, the tablet device may stop automatically to protect the internal circuitry.
- Do not take your tablet device directly from a cold place to a warm place. A sudden change of the temperature causes moisture condensation, and moisture may condense inside the tablet device. If this happens, leave the tablet device at room temperature until it dries before using.

Sample data

- Sample data is installed on your tablet device at the factory for a trial of music, videos, photos, and books. Once you delete the sample data, you cannot restore it. Please note that Sony will not provide replacement sample data if deleted.

Splash-proof Performance

Splash-proof feature of the tablet device

The tablet device has a splash-proof feature*¹ equivalent to IPX4 (Protected against water splashing from any direction) of IEC 60529 (Degrees of protection provided by enclosures (IP code)) but is not completely waterproof. Do not use the tablet device in water or splash a lot of water on the tablet device.

If used improperly, water may get inside the tablet device and cause fire, electric shock or malfunction.

Please understand the following cautions before using your tablet device.

*¹ The splash-proof feature works with your tablet device on a stand, such as Sony Tablet Stand (SGPDS4, sold separately, not available in some countries/regions) and with all covers closed completely.

Applicable liquids

- Protected against pure water and tap water
- Not protected against liquids other than those specified above (soap water, water containing detergents or bath salt, shampoo, hot spring water, pool water, seawater, etc.)

Performance of the splash-proof feature is based on measurements performed by Sony under the conditions stated above.

Please note that malfunctions caused by water exposure due to misuse are not covered under warranty.

Notes on charging

The supplied AC adapter and USB cable for Multi Port (SGPUC2) are not equipped with a splash-proof feature.

Make sure not to splash water on the AC adapter.

Do not use the AC adapter with wet hands or when the tablet device is wet. Doing so may cause danger of electric shock.

Please note the following cautions when charging the tablet device.

- Make sure the place you use the AC adapter is not wet.
- Make sure the tablet device is not wet before charging. If the tablet device becomes damp with water droplets, wipe the droplets completely with a dry cloth, and then leave the tablet device at room temperature until it is dry before charging.

Cautions when using the tablet device in the kitchen or other places with risk of splashing

Do not use the tablet device while connected to the AC adapter.

Make sure to use the tablet device with power from the internal battery pack.

Handling the AC adapter with wet hands or when the tablet is wet may cause danger of electric shock.

The splash-proof feature is only effective with all covers closed completely.

When closing covers, make sure small foreign objects (such as hair and sand) are not trapped in the covers. If water gets in the  (headset) jack, wipe off the water and leave the tablet device in a well-ventilated shady place until it is completely dry before attempting to use.

Do not use or leave the tablet device in a humid place such as a bathroom or sauna.

Do not use the tablet device with the headphones or headset connected.

Do not use the tablet device in water or splash a lot of water on it.

If the tablet device becomes wet, wipe it dry with a soft dry cloth, etc.

Do not let liquid such as soap water, shampoo, water containing detergents or bath salt, hot spring water, pool water or seawater get on or in your tablet device. Do not let foreign objects such as sand or mud get on the tablet device.

If something accidentally gets on the tablet device, wipe your tablet device with a soft dry cloth. Do not use detergents, chemicals or moist towelettes, etc. Do not dry the tablet device by blowing hot air using a hair dryer, putting the tablet device in the oven, etc.

Do not use the tablet device where water may splash on the tablet device strongly.

The tablet device is not resistant to water pressure. Exposing the tablet device to high water pressure such as that from a tap or shower may cause malfunctions.

Do not expose the tablet device to heat such as that from a hot shower, hair dryer, or a hot place such as near a stove.

The tablet device is not heat-resistant. Use the tablet device at temperature in the range of 5 °C (41 °F) to 35 °C (95 °F).

Note

- The Multi Port cover is necessary to make the use of the splash-proof feature. Keep the Multi Port cover in a safe place.
- Use the tablet device with the Multi Port cover and SD memory card slot cover attached. Otherwise, you will not be able to make the use of the splash-proof feature of the tablet device.

Checking the Android Version

You can confirm the version of the Android operating system running on your tablet device.

1. Tap [ Apps & Widgets] - [ Settings] - [About tablet].

You can check the version of Android running on your tablet device in [Android version].

Related Topic

[Updating Android to the Latest Version](#)

Updating Android to the Latest Version

Update your tablet device to the latest version of Android when updates become available.

Note

- Once you have updated, you cannot return your tablet device to an older version of Android. Updating requires the remaining battery level to be at 50% or greater and use of the AC adapter. Your tablet device may no longer turn on if the battery is depleted while updating.
- The data stored on the internal storage (memory space in your tablet device) will not be erased by updating.
- There must be enough free space on the internal storage to download the update files when updating.
- Some applications may not be compatible with the updated version of Android, and they may no longer run after updating.
- Be sure to check the Android version that each application is compatible with before updating.
- Updating may take longer if you connect to the Internet using the mobile communications function. In addition, large data charges may be incurred depending on the service you subscribe to. (SGPT13)

1. Tap  Apps & Widgets] - [ Settings] - [About tablet].

2. Tap [System updates].

The screen to start updating is displayed when an update is available. Start updating by following the instructions on the screen.

Related Topic

[Checking the Android Version](#)

Using the Home Screen

The Home screen consists of five separate screens. You can customize screens to fit your needs by placing your favorite apps and widgets on the screens.

A: Google search

Tap the box to easily search with Google.

B: Quick launcher

The Quick launcher is displayed on every page of the Home screen, so registering apps you use often gives you quick access to them.

1. Tap and hold an icon on the Home screen, and then drag it into the Quick launcher.

Hint

- You can move icons within Quick launcher, and move them out of the Quick launcher.

C: Guest Mode

Tap this to use Guest Mode for sharing the tablet device with other users such as your family or friends.

D: Apps & Widgets

Tap this to display the apps list and the widgets list.

E: Widgets

Widgets are simple apps running on the Home screen. You can choose your favorite widgets from the widgets list and place them on the Home screen.

F: Apps

You can choose your favorite apps from the apps list and place them on the Home screen.

G: Basic operation buttons

-  (Back): Tap this to return to the previous screen.
-  (Home): Tap this to display the Home screen.
-  (Recent Apps): Tap this to display the apps used recently.

- : Tap this to hide the keyboard when the keyboard is displayed.

H: Small Apps

You can open small versions of certain apps, such as the browser, calculator, and remote control, even while another app is in use.

I: Status bar

The status bar displays the remaining battery level and Wi-Fi connection icons. Notification icons are also displayed to tell you that downloading is complete, you have e-mails, or updates are available. By tapping the status bar, you can display the notification panel and control panel.

Sharing the Tablet Device with Family or Friends (Guest Mode)

If you share your tablet device with other users, registering Guest Mode enables you to make a Home screen for the guest. On the Home screen for the guest, only apps the guest is allowed to use are displayed, and you can set what wallpaper is displayed according to the mode.

To register a Guest Mode

1. Tap [ Guest Mode] on the Home screen.
2. Tap [Start].
3. Enter a name for the Guest Mode by following the on-screen instructions, and then tap [Next].
4. Select whether to restrict the use of apps, and then tap [Next].
 - If you select [Limited applications], tap apps you will allow the guest to use on the app selection screen, and then tap [SAVE] at the top right of the screen.
5. Select whether to set an unlock code, and then tap [Next].

To set an unlock code, select [Set code].

 - If you select [Set code], set a cancellation code by following the on-screen instructions.
6. Check the registration information for the Guest Mode, and then tap [Done].

Related Topic

[Using the Home Screen](#)

[Switching to Guest Mode](#)

Switching to Guest Mode

1. Tap [ Guest Mode] on the Home screen.
2. Select the desired mode.
The Home screen switches to the selected Guest Mode.

To cancel Guest Mode

1. Tap [ Exit] on the Home screen.
2. If an unlock code is set, enter the unlock code, and then tap [OK].

Hint

- To change the wallpaper in Guest Mode, tap and hold the Home screen to display the wallpaper selection screen, and then select a desired wallpaper.
- To edit or delete a Guest Mode, tap and hold the thumbnail of a Guest Mode on the mode selection screen, and then tap [Edit] or [Delete].
- To add a new Guest Mode, tap [ New mode] on the mode selection screen.

Note

- The Guest Mode function is not for security purposes. It is for restraining the restricted applications from being displayed.
- The Guest Mode function does not allow each user to store and protect personal data.
- Some apps may be accessible through other apps even if you restrict them using Guest Mode.
- Make sure not to forget the unlock code and secret answer you set. If you do forget them, you will need to reset tablet device settings factory default.
If you forget the unlock code, entering the secret answer correctly will allow you to reset the unlock code.
- You may not be able to switch to Guest Mode if you installed home application made by a company other than Sony.
- You cannot update the system software during Guest Mode.
- Even if you switch to Guest Mode, apps used recently and notifications will remain. Apps running in the background such as apps playing music in the background also will not stop.
- Since some tablet device functions are restricted in Guest Mode, Small Apps and the Quick launcher will not be available.

Adding Apps or Widgets to the Home Screen

You can flick the Home screen right/left to scroll between up to five screens. Adding app icons or widgets to your favorite location allows you to start apps easily.

1. Flick to display the Home screen on which you want to place apps icons or widgets, and then tap [⋮ Apps & Widgets] at the top right of the screen.
2. Select the item you want to add to the Home screen from [Apps] or [Widgets].
3. Tap and hold the icon of the app or widget, then drop it when the Home screen is displayed. The icon or widget is added to the page you drop the icon or widget onto.

To delete an icon from the Home screen

Tap and hold the icon, and drag and drop it to  (Remove).

To organize icons using folders

You can use folders to organize icons on the Home screen.

1. Tap and hold an icon, then drag it on top of another icon. The two icons are then combined into a folder.
2. Tap the combined icon folder, then tap [Unnamed Folder].
3. Enter a new folder name, and then tap . The folder is shown with the new folder name.

Hint

- To add an app to a folder, tap and hold the icon, then drag and drop it into the folder.
- To remove an app from a folder, tap to open the folder, then drag the icon out of the folder. When all apps are removed from the folder, the folder is deleted automatically.

Using “Small Apps”

There are a number of apps installed on the tablet device called Small Apps. Small Apps give you the flexibility to open certain apps without closing other apps. For example, you may have an app such as the Email app open and want to open another app such as the Browser app. Instead of closing the Email app and opening the Browser app, you can keep the Email app open and start the Browser Small App. The Small App (Browser) is then displayed over the existing app (Email).

To start Small Apps

1. Tap  on the Home screen.
The Small Apps launcher appears.
2. Tap the app you want to start.

Display on the screen		Description
1	Move	Dragging this moves the Small Apps window. Double tap to resize the window to a size appropriate for the screen (Unavailable in some apps that cannot resize the window.).
2	Close	Closes Small Apps.
3	Expand/Contract the window	Drag to expand/contract the window (Unavailable in some apps that cannot resize the window.).

To set a shortcut

You can create shortcuts for Small Apps you often use.

1. On the Small Apps launcher, tap and hold the app you want to set.
The menu appears.
2. Tap [Create shortcut to this item].
A shortcut is created to the right of .

Hint

- By tapping  on the Small Apps launcher and then tapping [Clear shortcut], you can delete the shortcut you

set.

To use a widget

You can display a widget while another app is in use.

To add a widget

1. Tap  Add] on the Small Apps launcher.
2. Tap the widget you want to add.
3. Enter a label name, and then tap [OK].
The widget is added to the Small Apps launcher.

To delete a widget

1. On the Small Apps launcher, tap and hold the widget you want to delete.
The menu appears.
2. Tap [Remove from screen].

Hint

- Only widgets can be deleted from the Small Apps launcher. Apps cannot be deleted from the launcher.

Searching with Google

You can search websites, apps downloaded to the tablet device or data using Google Search.

To search by text

1. Tap [Google] on the top left of the Home screen, and enter keywords.
2. Tap an item on the search result list.
By tapping  on the keyboard, you can start the Browser app and also display the search results.

To search by voice

1. On the top left of the Home screen tap , or [Google] and then tap .
2. Speak keywords by following the on-screen instructions.
The Browser app starts and displays the search results.

Confirming Download or Update Information on the Status Bar

The notification icons tell you that downloading is complete, you have e-mails, or updates are available. By tapping the status bar, you can display the notification panel. You can display the control panel and open downloaded files directly from the notification panel.

	Description
1	Tap to display the control panel.
2	Displays the status of the battery and Wi-Fi connection.
3	Tap to open items you are notified about and related apps directly.
4	Closes the notification panel.

Note

- If you close the notification panel, the notification will be deleted. You can display the downloaded content from the [ Downloads] app.

You can control the following items from the control panel.

- Airplane mode: Turns on/off airplane mode. When this mode is turned on, wireless communications are turned off.
- Wi-Fi: Displays the Wi-Fi setting screen [\[Details\]](#).
- Auto-rotate screen: Locks the screen so it does not rotate automatically [\[Details\]](#).
- Brightness: Adjusts the screen brightness [\[Details\]](#).
- Notifications: Turns on/off notifications. If you turn this off, the notification icons will not appear on the status bar.
- Settings: Displays the settings screen.

Configuring Screen Rotation

The screen rotates when you turn your tablet device sideways as shown below.

Note

- Depending on the application, the screen may rotate regardless of the direction your tablet device is held.
- Some apps may not support screen rotation. Some apps may rotate the screen in reverse.
- Screen rotation is not available when the HDMI adapter cable is attached to your tablet device.

Setting the screen to not rotate

1. Tap [⋮ Apps & Widgets] - [⚙ Settings] - [Display] - [Auto-rotate screen] in that order to remove the check mark and disable screen rotation.

To set the screen to rotate again

Tap [Auto-rotate screen] again to add a check mark and enable screen rotation.

You can also turn on/off the screen rotation on the control panel displayed from the status bar.

Configuring to Lock the Screen

If you set the lock function, the screen is automatically locked for security purposes when turning the screen on (deactivating sleep mode).

To configure the lock function

1. Tap  Apps & Widgets] - [ Settings] - [Security] - [Screen lock] in that order.

2. Tap the desired setting from the following items.

[None]: Lock function not used.

[Slide]: Default setting. Tap , then tap  to unlock.

[Pattern]: Trace nine pass points with a finger. If you fail to unlock five times, the entry screen for the Google account will appear. Enter your account name, and you will receive the procedure to unlock by e-mail.

[PIN]: Set a code of your choice consisting of four or more numbers.

[Passwords]: Set a password consisting of four or more numbers/letters.

Hint

- Make sure to write down the PIN number or password you set and keep it in a safe place.

3. Follow the on-screen instructions.

Entering Text

You can enter text using the keyboard displayed on the screen.

Display on the screen	Description
	Switches between letters, numbers and symbols.
 *1	Enters capital letters.
 *2	Enters other symbols.
 *3	Switches the input language.
	Deletes text.
	Enters or adds linefeeds.

*1 Capital-letter entry will deactivate after you enter one letter. Tap this key every time you enter a capital letter. To input capital letters continuously (caps lock), double-tap the key. To cancel the caps lock, press this key again.

*2 This appears when you enter numbers or symbols.

*3 This appears when you have selected multiple languages to use for input. Every time you tap the key, the input mode switches between the modes you have set. Tap and hold to display the input mode switching screen.

Hint

- Pressing and holding a key with a triangle mark  on the bottom right corner allows you to enter letters or symbols, etc. related to the letter of the key.
- To enter a URL or letters, tap the area where you want to enter text to display the on-screen keyboard.
- A numerical keyboard can also be displayed. Tap  [Apps & Widgets] -  [Settings] -  [Language & input]. Then tap  next to [Standard keyboard] followed by [Number keys] to add a check mark.

To set the input language

Tap  [Apps & Widgets] -  [Settings] -  [Language & input]. Then tap  next to [Standard keyboard] followed by [Input languages], and then put a check mark on the languages to use.

To hide the on-screen keyboard

Tap  on the bottom left of the screen.

Selecting Text

You can copy or search text from the menu that is displayed by selecting text on a website or URL.

1. Tap and hold the text.
The selected text will be highlighted.
2. Tap the desired item from the menu at the top right of the screen.

Hint

- You can change the range of text selected by dragging the cursor that appears in step 1 across the text.

To paste text

1. Tap and hold the location to paste the text, and then tap [PASTE] or [CLIPBOARD].

Hint

- Tap [CLIPBOARD] to display in a list the history of text that has been copied. Text that is frequently used can also be added to Favorites.
- You can change the location to paste the text by dragging the cursor to a new location.

Configuring a Google Account

You must sign up for a Google account to use services provided by Google, such as Google Play Store (free registration).

With a Google account, you can sync apps such as Email, Calendar and People on your tablet device with other devices that also support Google services.

Use your current Google account

If you already have a Google account that you use with a computer or smartphone, you can use that account with your tablet device too. Input your account name and password in the login screen displayed for Google service apps.

Note

- Make sure that your tablet device is connected to the Internet when you sign up for a new Google account or log in.

Sign up for a new Google account on your tablet device

You can sign up for a Google account when you use your tablet device for the first time or start a Google service app for the first time.

Hint

- You do not have to sign up for another Google account if you already have one.
- You can sign up for a Google account by tapping [⋮] Apps & Widgets] - [⚙ Settings] - [Accounts & sync] - [Add account] (at the top right of the screen) - [Google] in that order.
- You can also sign up for a Google account by accessing Google (<https://www.google.com/accounts/>) directly.

Backing Up Data on Your Tablet Device

You should copy the data in your tablet device and store it on another storage device (backup). Various data such as recorded images, downloaded music and video content will accumulate in your tablet device as you use them. If unexpected problems occur with your tablet device, that data may be damaged or lost. As a preventive measure in case of such accidents, you should make frequent backups so you will be able to restore your important data.

Note

- Some data on your tablet device cannot be backed up.
- Some settings and applications may not have any backup method. Make written notes and keep them in a safe place.

Data you can back up

You can copy and store the following data with your tablet device for backup.

- Music/movie/eBook files without copyright protection
- Pictures/wallpapers

That data is stored in the following folders.

- Music files: \Music
- Wallpaper files: \Pictures
- Movie files: \Movie
- Picture files: \DCIM
- eBook files: \Reader

Backing up data (copying)

Use the File transfer app to store the data on a commercially available SD memory card.

1. Tap [ Apps & Widgets] followed by [ File transfer] to start the File transfer app.
2. Insert the SD memory card into the SD card slot.
3. Select the file/folder you want to copy from your tablet device.
4. Tap .

A folder called “\transferred” is created on the SD memory card, and the data is copied to that folder.

Note

- Since video content purchased at Video Unlimited*¹ is copyrighted, you cannot back it up by the above mentioned method. Copy it on a computer using “Media Go” computer software. Go here to learn more about the Media Go application.

<http://mediago.sony.com/enu/introduction/>

*¹ Video Unlimited is a video service available on Sony Entertainment Network.

Checking the Free Space

Importing/Exporting Contents from an SD Memory Card

Importing Content from Your Computer

If you connect a computer to your tablet device using the supplied USB cable for Multi Port (SGPUC2), you can copy data on the computer to your tablet device. The copied data can then be played back on your tablet device.

1. Connect the tablet device to your computer using the supplied USB cable for Multi Port (SGPUC2).
2. On the computer, open a folder that includes the file you want to export to the tablet device.
3. Click the [Start] button on your computer.
4. Click [Computer].
5. Double-click the model name of your tablet device.
6. Double-click the destination to save the data.
7. Drag and drop the file you want to copy onto this screen.

Note

- The menu name displayed in the procedure above varies depending on your computer operating system, computer environment or the Android operating system of the tablet device.
- Do not turn off the tablet device or remove the USB cable for Multi Port (SGPUC2) while copying data. That may cause the data to be damaged.
- Your tablet device does not support charging the battery via USB connection from a computer or a commercially available charger not designated by Sony.
- Only copied data in supported file formats can be played back on your tablet device.
- Check the free space of your tablet device when you import data from the computer.

Using the Calendar

You can manage your schedule on your tablet device. By registering your Google account, you can sync your Google Calendar and your schedule data.

1. Tap [ Apps & Widgets] - [ Calendar].

The calendar is displayed.

Display on the screen	Description
1 DAY	Displays the events for one day.
2 WEEK	Displays the calendar by week.
3 MONTH	Displays the calendar by month.
4 AGENDA	Displays the list of scheduled items.
5 TODAY	Displays today's schedule.
6 New event	Adds events.
7 Set date	Sets a date to be displayed.
8 Search	Searches for an event.
9 Option menu	Makes detailed settings such as refreshing the display or configuring general settings for Calendar.

Hint

- You can flick up/down/right/left on the schedule list or mini-calendar to browse through months or dates and times to find events.

Adding an event

1. Tap and hold the date and time you want to add an event for, and then tap [New event]. Or, tap .
2. Input the starting date and time and details of the schedule, and then tap [DONE] at the top right of the screen.

Hint

- You can have your tablet device notify you when close to the scheduled date and time.

Changing an event

1. Tap the event you want to change.
2. Tap , input the item to be changed, and then tap [DONE] at the top right of the screen.

Deleting an event

1. Tap the event you want to delete.
2. Tap  followed by [OK].

Note

- When you share the schedule on Google Calendar, choose the people with whom you share it very carefully to prevent your schedule from being disclosed to undesired users.
- If your calendar is not synced with Google Calendar automatically, tap [ Settings] followed by [Accounts & sync], and make sure the switch at the top right of the screen is set to [ON].
- If your calendar is set to sync with Google Calendar automatically and you change the schedule on a computer or other devices, your tablet device will connect with Google Calendar automatically. This may cause unexpected communications charges.

Shooting Photos/Movies

You can shoot photos and movies using the built-in front and rear cameras. Various shooting settings such as image size are also available. Location information also can be added to photos.

1. Tap [☰ Apps & Widgets] - [📷 Camera].

The Camera app starts.

Display on the screen	Description
1 Detailed settings	Makes detailed settings for recording photos or movies.
2 Preview screen	Previews the subject you are aimed at.
3 Camera switching	Switches between the front camera and rear camera.
4 Recording button	Starts recording a photo or movie.
5 Switch recording mode	Switches the recording mode among photo, movie, and panoramic photo.
6 Recording history	Displays thumbnails of recorded photos or movies.

2. Aim the camera to your subject, and tap  to shoot a photo or  to shoot a movie.

For photos: A photo is taken.

For movies: Movie recording starts. Tapping  again stops recording.

Note

- Do not touch the lenses of the built-in cameras. If the lenses become dirty or scratched, image quality may be affected.
- Do not let direct sunlight enter the lenses of the built-in cameras regardless of whether your tablet device is turned on or off. Doing so may cause the camera to malfunction.

Hint

- The rear camera is equipped with an auto-focus function. After you tap , a photo is shot when the subject

comes into focus.

- In order to add location information to the photos, GPS must be enabled or your tablet device must be connected to the network when you take photos [\[Details\]](#).
- You can also view pictures you took and media from apps you play back.
- The focus function allows you to focus the part you tap on the touch panel and select a mode.
- You can also take a picture while taking a movie by tapping .

Shooting Panoramic Photos

1. Start the Camera app.
2. Tap  at the right side of the screen.
3. Point the camera at the edge of the subject, and tap .

Panoramic photo recording starts. Pan or tilt the camera to the opposite end of the subject, and tap  again to stop recording.

Hint

- When you hold your tablet device sideways, you can shoot landscape panoramic photos. When you hold your tablet device upright, you can shoot portrait panoramic photos.

Ending the Camera app

Tap  displayed on the status bar at the bottom left of the screen. If the status bar is not displayed, tap the bottom left of the screen once.

Copyright and portrait rights

The images and sounds you record on your tablet device may be copyrighted. Unauthorized use of such materials other than for personal use may violate copyright laws. Using or modifying images or names of other people without their permission may violate portrait rights. You should thus take into account copyright and portrait rights when putting recorded images on Internet websites. Some performances, shows and exhibits may restrict recording, even if it is for personal use. Unauthorized recording of such materials may be contrary to copyright laws.

Configuring an E-mail Account

The e-mail account you usually use on your computer can be used on the tablet device. If you register multiple e-mail accounts, you can handle e-mails of all the accounts at the same time. You can also search or sort received e-mail messages.

1. Tap [☰ Apps & Widgets] - [✉ Email].

The Email app starts and the screen to set an account is displayed.

2. Input your e-mail address and password, and tap [Next].

3. Follow the on-screen instructions to set the e-mail account.

When setting is complete, the e-mail list screen is displayed.

Display on the screen		Description
1	Selection	Allows you to select e-mails by tapping check boxes to move e-mails to another folder or delete them together.
2	Compose an e-mail	Composes and sends an e-mail [Details] .
3	Search	Searches for e-mails from the e-mail list.
4	Refresh	Receives e-mails.
5	Option menu	Sorts e-mails, adds/removes accounts, etc.

Hint

- You can set for each account the number of received e-mails to be put in a folder by tapping [☰] (Option menu) - [Settings] - (e-mail account you want to change settings of) - [Messages per folder] on the e-mail list screen.
- Searches cover the subject, sender, and e-mail body of all the e-mails saved on the server.
- Results are displayed 10 at a time from the latest e-mails. To search for older e-mails, tap [Load more messages].

Note

- Ask your network administrator, etc. about how to connect to Microsoft Exchange Server.
 - For details on setting an e-mail address supplied by an Internet provider, refer to the provider's website, support center, etc.
-

3. Input the address (URL) of the desired website, and tap the  key.

Note

- If the content does not display correctly, tap [Settings] followed by [Advanced] in the  (Option menu), then tap [Enable Quick view] to remove the check mark.
- Certain websites may not be displayed because the browser does not support the photo/movie formats or plug-ins used by the website.
- You can launch the browser using the Small Apps feature. In this case, the following functions are not supported.
 - Playing back flash content
 - Browsing websites by using tabs
 - Bookmarks and access histories

Hint

- You can search the Internet by inputting a keyword or phrase instead of the address (URL) in step 3.
- If the address bar is not displayed at the top of the screen, tap the tab.
- You can copy or search text from the menu that is displayed by selecting text on a website or URL.
- If the website is displayed differently from when browsed on a computer, tap  (Option menu) at the top right of the screen and put a check mark in [Request desktop site] in the menu. You can then browse the website as on a computer.
- You can set whether to view as a desktop or mobile site for each tab.

To add/delete a tab

To add a tab, tap  at the right end of the tabs list.

To delete a tab, tap  at the right end inside the tab.

Using Your Tablet Device as a Remote Control

You can switch between two types of remote controls on the remote control screen.

- “Full” remote control
You can operate the remote control function by tapping buttons, just like with an ordinary IR remote control.
- “Gesture” remote control
This gives a new feel to remote control operations. The remote control function reacts when the tablet device senses movement of your fingers such as tapping and flicking on the touch screen, no matter where on the screen you touch. That way, you can operate the remote control instinctively, without looking at the screen of your tablet device.

Related Topic

[Registering the Remote Control](#)

[Using “MediaRemote”](#)

Registering the Remote Control

The tablet device can be used as a remote control by using the infrared remote (IR) control feature.

By registering multiple remote control codes, you can operate multiple devices with one tablet device.

Frequently used operations such as changing the volume or channels can be performed by intuitive gestures.

1. Tap [ Apps & Widgets] - [ Remote control].

The Remote control app starts.

2. Tap [Register device] or [ Register device].

3. Tap [Easy registration].

4. Register your tablet device as a remote control by following the on-screen instructions.

Execute [Remote control test] if needed.

When you finished setting, the device list screen is displayed. Tap the name of registered device.

Display on the screen	Description
1	Switch between full or gesture remote control feature Switches the remote control feature between the “gesture” remote control feature operated by gestures such as flicking or sliding and the “full” remote control feature operated by tapping [Details] .
2	Switch the registered remote controls Switches the registered remote control by tapping the icon at the left and right of the currently controlled device.
3	Configure macro Registers the macro that allows you to perform multiple device commands in succession just by tapping the button.
4	Option menu Sets detailed settings such as editing or deleting the registered devices.
5	Registered macro Tap to run the registered macro.

Hint

- This app can use as Small Apps.
- You can configure the skin setting by tapping [Change skin] on the  (Option menu). You can configure the skin separately for each registered device.

- If the category or manufacturer is not displayed, allow your tablet device to learn the remote control signal then register it.
- Two or more devices may be displayed depending on the category or manufacturer. If more than one device is displayed, test the remote control operation with each of remote control displayed and select the one that works correctly.

To register as a remote control for another device

Tap  (Back), and then tap [ Register device] on the device list screen.

Learning the remote control signal and registering it

If the category or manufacturer of the device is not displayed at [Easy registration], register the remote control as follows.

1. Start the Remote control app.
2. Tap [ Register device] or [Register device].
3. Tap [Learn from a remote control].
4. Select the category.
A remote control image is displayed on the screen.
5. Tap the button you want to assign the signal to.
6. When the menu screen is displayed, tap [Learn remote command].
7. Bring the remote control to be registered close to the IR data port of your tablet device, tap [Start], and press the button to be learned on the remote control.
When the button is registered, the screen returns to the remote control display.

Hint

- To learn more buttons, repeat steps 4 to 7.

[Programming Operations in the Remote Control \(Macro Function\)](#)

Programming Operations in the Remote Control (Macro Function)

With the macro function, you can register multiple operations of devices registered to the remote control app in succession, allowing you to perform the operations in the order registered just by tapping a button.

1. Start the Remote control app.
2. Select and tap the desired device.
3. Tap  Macros].
4. Tap [New macro].
Register a macro in the following order.
 - Select a button.
 - Check the operation (register the timing of the operation).
 - Input a name for the macro.

Tap [OK], and then follow the on-screen instructions.

If the registration completes, a button with a macro name will appear at the bottom of the remote control screen. By tapping the button, you can run the registered macro.

Setting the Audio Output Sound

You can set the audio output sound to better enjoy music, videos, games, and more.

Sound settings include Sony-recommended [ClearAudio+], [Sound enhancements] that you can adjust as you would like, and [Dynamic normalizer].

1. Tap  Apps & Widgets] -  Settings] - [Sound].
2. Tap the desired setting from the following items.
 - [ClearAudio+]: Sony recommended sound settings for music optimize the settings of digital signal processing technology with just one touch.
 - [Sound enhancements]: Set the audio technologies your tablet device is equipped with or check which of those are being used. Those settings are not available when [ClearAudio+] is on. The items you can configure from the settings are as follows.
 - [Equalizer]: Set the sound quality suited for the genre of music.
 - [Clear Phase(TM)]: Set the sound quality suited for the built-in speakers.
 - [xLOUD(TM)]: Reproduce dynamic sound from the built-in speakers. This setting is not available when [S-Force Front Surround 3D] is on.
 - [S-Force Front Surround 3D]: Re-create a surround 3D sound field virtually.
 - [Dynamic normalizer]: Minimize volume differences between content. For example, this setting can prevent songs from playing back too loud or too quiet when you play back songs at random from multiple albums with different recording volumes.

Note

- [S-Force Front Surround 3D], [xLOUD(TM)], and [Dynamic normalizer] are not available while using some voice communications apps.
- [ClearAudio+], [Sound enhancements], and [Dynamic normalizer] are not supported with devices connected via Bluetooth or Multi Port.

[Changing the Settings](#)

Using the “App Selector” with the tablet device attached to the Dock Speaker

The App Selector starts automatically when you attach the tablet device to the Dock Speaker (SGPSPK1, sold separately).

With the App Selector, you can use the remote commander supplied with the Dock Speaker to select or operate apps.

Display on the screen		Description
1	Apps available when your tablet device is connected to the Dock Speaker	You can start or operate the apps using the remote commander supplied with the Dock Speaker.
2	Option menu	Adds/removes the apps that are available when your tablet device is connected to the Dock Speaker, changes order of the apps, or changes the App Selector settings.

Hint

- For details such as the procedures to connect the tablet device or operate the remote commander, refer to the Operating Instructions of the Dock Speaker.
- You can start the App Selector by pressing the HOME button on the remote commander even if you have selected  (Option menu) - [Settings] - [App Selector launch settings] - [Do nothing]. You can also continue using a running app if you connect your tablet device to the Dock Speaker while that app is running.

Note

- Update your tablet device to the latest version of Android when you use the App Selector [\[Details\]](#).
- You cannot start the App Selector from the remote commander when your tablet device is locked with [Pattern], [PIN] or [Passwords]. In this case, unlock your tablet device before using the remote commander.
- The Dock Speaker does not output sound when you connect the tablet device to the Dock Speaker while the tablet device is muted. In this case, unmute the tablet device.
- The settings of [ClearAudio+], [Sound enhancements] and [Dynamic normalizer] do not affect to the output sound from the Dock Speaker [\[Details\]](#).
- Some apps cannot be operated with the remote commander.

- The Dock Speaker may not be available in some countries/regions.

Unmute the tablet device automatically when connected to the Dock Speaker

You can set the tablet device to output sound from the Dock Speaker even if you connect the tablet device to the Dock Speaker while muted.

1. Tap  (Option menu) - [Settings] - [What to do when the tablet is muted].
2. Tap [Unmute the tablet automatically].

Note

- If you select this setting, the tablet device will be unmuted and will remain unmuted even if you disconnect the tablet device from the Dock Speaker.

Using Sony Select

Sony Select allows you to access a website that introduces a select range of apps appropriate for use with your tablet device.

1. Tap [ Apps & Widgets] - [.

The browser starts and displays the website.

Note

- To download apps, Google account settings are required.
- Charges apply for some apps.
- A large volume of data is transferred when downloading and updating apps.

Playing Photos/Videos

The Gallery app allows you to show or play photos and video on your tablet device or Picasa web albums. You can also easily post photos to online services to share them.

You can display detailed information as well as sort or filter your photos and videos.

1. Tap [ Apps & Widgets] - [ Gallery].

The Gallery app starts.

2. Tap albums or thumbnails to select the photos or videos you want to play.

The selected photos or videos are played on the playback screen.

Display on the screen		Description
1	Share	Selects the service you want to use to share photos or movies and posts them.
2	Slide show	Starts slide show playback.
3	Switch display area of photos	Switches the display area of photos.
4	Delete	Deletes the selected photo.
5	Option menu	Sets or adjusts settings such as editing photos.

Hint

- You can play photos or videos stored in Picasa web albums. If you set to sync with Picasa web albums available with the Google account that you set with the Settings app, the Picasa web albums will appear in your album list.
- Using the menu at the top right of the screen, you can sort photos or videos by details such as the time or place they were taken.
- By tapping and holding thumbnails in succession, you can select multiple photos or videos.
- You can control playback on the playback screen.

To display photos full-screen

Tap [Fill display area] from the option menu of the photo playback screen. To cancel full-screen view, tap [Fit to display area].

To display shooting location

Tap  or  with the display area not expanded. If the photo has information on where it was shot, a map appears with the location indicated on the map. To return to the thumbnails, tap .

Hint

- You can shoot photos that include location information using the built-in cameras.

Playing back photos automatically (slide show)

1. Select albums or thumbnails for photos you want to play back as a slide show, and then tap . Slide show playback starts.

Reading Digital Books

Carry your favorite digital books on your tablet device. The intuitive design is ideal for on-the-go reading, allowing you to bookmark, highlight and adjust font size as you read. You can even sync bookmarks and highlighted items with other compatible devices. Purchasing content is made easy by the online Reader(TM) Store. In countries where you cannot purchase from the Reader(TM) Store, you can still enjoy books on your tablet device by loading them from a memory card (books without copy-protection only).

- Bookmarking and highlighting
- Adjustable font sizes
- Intuitive navigation
- Syncing with other compatible devices

1. Tap  Apps & Widgets] -[ Reader by Sony].

The Reader by Sony app starts.

Note

- Reader (TM) Store may not be available in some countries/regions.
- Reader (TM) Store uses Adobe DRM, and an Adobe ID is required to authorize your tablet for viewing protected content.
- If you do not have an Adobe ID already, Reader (TM) Store will create one using the same email address and password you used to create a Reader (TM) Store account.
- If you already have an Adobe ID, you may be prompted to provide the appropriate email and password to authorize your tablet.
- eBooks purchased at Reader (TM) Store will automatically be displayed in your library.
- With the Reader by Sony app on your tablet, you can enjoy books other than those from the Reader (TM) Store EPUB or PDF eBooks by loading them via USB or SD card or by downloading the content directly from your tablet's browser.

4	Option menu	Sets detailed settings such as managing labels or configuring general settings for Gmail.

Note

- To see details on how to use Gmail, tap [⋮] (Option menu) - [Help].

Searching for Apps

Apps such as helpful tools and games can be downloaded to your tablet device from Google Play provided by Google. You can also check for app updates and update apps to the latest version.

Tap [ Apps & Widgets] at the top right of the Home screen, followed by [ Play Store] on the apps list.

You can also use Google Play from your computer.

<http://play.google.com/>

This site displays Google Play and allows you to manage apps you downloaded from Google Play and installed on your tablet device.

To use Play Store, you need to sign-in your Google account [[Details](#)].

Using “MediaRemote”

MediaRemote is a Wi-Fi remote control app that can be used with devices such as Sony BRAVIA TVs and Blu-ray disc players. Enabling more than just conventional remote control operations, MediaRemote has various functions such as keyboard entry and content information display, giving you greater utility and enjoyment with Sony devices.

Note

- Be careful of home network security when you enter personal information.

Preparing MediaRemote

1. Connect the Sony device to your home network.
For details on how to connect, see the operating instructions supplied with the device and Wi-Fi router.
2. Connect your tablet device to the same home network that the Sony device is connected to.
3. Register your tablet device on the Sony device.
For details on settings, see the operating instructions supplied with the device.

See the Help in the MediaRemote app to find out how to use that app.

Using “Media Go”

Media Go is computer software that supports content management and transfers content between your tablet device and computer. By installing Media Go in your computer, you can transfer music, photos, and videos to your tablet device.

Note

- For details on how to use Media Go, refer to the help in the main menu of Media Go.

Installing Media Go on your computer

1. Access <http://www.sony.com/mediago/Tablet> from your computer and download Media Go.
2. Double-click the downloaded file.
3. Install Media Go by following the instructions on the screen.
If you are prompted to install additional software components during installation, download and install them as instructed.

Transferring content to your tablet device using Media Go

1. Connect your computer to your tablet device with the supplied USB cable for Multi Port.
2. Start Media Go by selecting it from the start menu of your computer.
You can now transfer content between your tablet device and computer.

Note

- If [the model name of your tablet device] is not displayed on the left of the Media Go screen, this means that your tablet device is not recognized by the computer. Check whether or not the device driver is installed correctly.
- For details on using Media Go on a computer, refer to <http://www.sony.com/mediago/Tablet>.

Evernote

Evernote turns your tablet into an extension of your brain.

Evernote is an easy-to-use, free app that helps you remember everything across all of your tablet. Stay organized, save your ideas and improve productivity. Evernote lets you take notes, capture photos, create to-do lists, record voice reminders--and makes these notes completely searchable, whether you are at home, at work, or on the go.

Key features

- Sync all of your notes across the computers and devices you use
- Create and edit text notes, to-dos and task lists
- Save, sync and share files
- Search for text inside images
- Organize notes by notebooks and tags
- Email notes and save tweets to your Evernote account
- Connect Evernote to other apps and products you use
- Share notes with friends and colleagues via Facebook and Twitter

Premium features

- Take notebooks offline to access them anytime
- Allow others to edit your notebooks
- Add a PIN lock to your Evernote app

AccuWeather

AccuWeather forecasts for 2.7 million locations, supports 27 languages, and has descriptive weather graphics that will appeal to your tablet. With GPS and interactive Google Maps, this free weather app makes it easy to get detailed and current forecasts and news from the most trusted name in weather.

Features include severe weather notices, home screen widgets, animated radar, satellite, special lifestyle and health forecasts, display options, and much more:

- Animated radar for North America, satellite and interactive Google Maps for locations worldwide, and current, broadcast-quality weather videos.
- Severe weather notices for events such as, snow, ice, rain, wind, and thunderstorms.
- Hourly forecasts for the next 24 hours, plus day and night forecasts for the next fifteen days.
- Details including, humidity percentages, visibility, pressure, dew point, precipitation and amounts, UV index, wind and wind gust speed, wind direction, and AM and PM times for sunrise and sunset.
- RealFeel - AccuWeather's proprietary weather forecasting system that takes into account multiple weather conditions to determine how the local temperature actually feels, which may be warmer or colder than the temperature depending on these conditions.
- Special lifestyle weather and health forecasts, as well as conditions for specific outdoor activities and sports, such as golfing, fishing, and jogging, and health-related weather forecasts, such as flu and migraine headache forecasts.
- AccuWeather widgets for your tablet's home screen that link directly to the full app.

Netflix

Netflix is the world's leading subscription service for watching TV episodes and movies on your tablet. The Netflix application is designed to deliver the best experience on your tablet anywhere, anytime.

Get the free app as a part of your Netflix membership and you can instantly watch thousands of TV episodes & movies on your tablet.

If you are not a Netflix member then sign up for Netflix and start enjoying immediately on your tablet with our one-month free trial.

How does Netflix work?

- Netflix membership gives you access to unlimited TV shows and movies for one low monthly price.
- With the Netflix app you can instantly watch as many TV episodes & movies as you want, as often as you want, anytime you want.
- You can browse a growing selection of thousands of titles, and new episodes that are added regularly.
- Search for titles and watch immediately on your phone or on an ever expanding list of supported device.
- Rate your favorite shows and movies and tell us what you like so Netflix can help suggest the best titles for you.
- Start watching on one device, and resume watching on another. Check out netflix.com for all the TVs, game consoles, tablets, phones, Blu-ray players and set top boxes on which you can watch Netflix.

Note

- This app or service may not be available in some countries/regions.
- By downloading this application you agree to the Netflix Terms of Use and Privacy Policy, located at www.netflix.com

1-month free Netflix membership offer is available to first time and certain former members and cannot be combined with any other offer. Internet access and valid payment method are required to redeem offer. Netflix will begin to bill your payment method for the Netflix membership fee at the end of the free month unless you cancel prior to the end of the first month. Your Netflix membership is a month-to-month subscription that you can cancel at any time. Go to "Your Account" on the Netflix website for cancellation instructions. No refund or credit for partial monthly subscription periods. The Netflix service is only available in the country where you originally signed up. A device that streams from Netflix (manufactured and sold separately) and broadband Internet connection are required to watch instantly. For complete terms and conditions, please visit <http://www.netflix.com/TermsOfUse>.

--	--------------------------	--

*1 Some models are not available in some countries/regions.

*2 The item is not supplied in some countries/regions.

Features and specifications are subject to change without notice.

The tablet device does not turn on.

The battery may be extremely low on power.

- Connect your tablet device to an AC outlet (wall socket), and charge the battery.

Your tablet device may be turned off completely.

- Press and hold the power button for three seconds to turn on your tablet device.

When your tablet device is using power supplied from the outlet, make sure you have securely connected the tablet device with the USB cable for Multi Port, the USB cable for Multi Port with the AC adapter, the AC adapter with an AC power cord (mains lead)*, and an AC power cord (mains lead) with an AC outlet (wall socket).

- When your tablet device is sitting in the cradle (sold separately), make sure you have securely connected the tablet device with the cradle, the cradle with the USB cable for Multi Port, the USB cable for Multi Port with the AC adapter, the AC adapter and an AC power cord (mains lead)*, and an AC power cord (mains lead) with an AC outlet (wall socket).

If you have not turned off your tablet device properly, the power supply controller may have stopped due to a program failure. Reset the tablet device by pressing and holding the power button for about 10 seconds, and then turn on the tablet device again [\[Details\]](#).

* You do not need an AC power cord (mains lead) in some countries.

The tablet device starts up slowly.

When you boot your tablet device with the power turned off, it may take some time to boot up.

The battery does not charge.

Make sure you have securely connected the tablet device with the USB cable for Multi Port, the USB cable for Multi Port with the AC adapter, the AC adapter with an AC power cord (mains lead), and an AC power cord (mains lead) with an AC outlet (wall socket).

* You do not need an AC power cord (mains lead) in some countries.

If the temperature of the tablet device rises in situations such as while using apps (Browser, Email, Camera, or playing videos/music), the battery may not be charged. If the temperature rises, shut down the running apps. The battery will begin to charge when the tablet device returns to normal temperature.

Your tablet device does not support charging the battery via USB connection from a computer or a commercially available charger not designated by Sony.

The charge indicator does not appear.

Make sure you have securely connected the tablet device with the USB cable for Multi Port, the USB cable for Multi Port with the AC adapter, the AC adapter with an AC power cord (mains lead), and an AC power cord (mains lead) with an AC outlet (wall socket).

* You do not need an AC power cord (mains lead) in some countries.

Your tablet device does not support charging the battery via USB connection from a computer or a commercially available charger not designated by Sony. Charge the battery using the supplied AC adapter or designated Sony AC adapter.

Battery consumption increases.

The battery may be deteriorated.

- Contact the service/support center named in the warranty to replace the battery.

The charge indicator blinks.

The charge indicator blinks slowly (every 3 seconds) when the remaining battery level is 15% or less. Plug in your tablet device and charge the battery [\[Details\]](#).

- The charge indicator does not blink while your tablet device is turned off, even if the remaining battery level is 15% or less.

When the charge indicator blinks fast (every 0.5 seconds), your tablet device may be in need of repair. Stop using the tablet device and contact the service/support center named in the warranty.

Heat builds up in the tablet device and the AC adapter while the tablet device is in use or being charged.

Heat buildup while the tablet device is in use or being charged is normal and should not affect the performance of your tablet device.

The tablet device may shut down for safety when overheated. If this happens, use the tablet device in a cool area until it cools down.

If your tablet device becomes abnormally hot, it may be in need of repair. Turn off your tablet device, and stop using the the AC adapter and tablet device. Contact the service/support center named in the warranty.

The screen is dark.

Make sure the screen brightness of your tablet device is not set at the lowest level.

Make sure the remaining battery level is sufficient.

Be careful not to cover the ambient light sensor.

The screen may seem dark if used outdoors on a clear day.

If you have the automatic brightness setting enabled, the brightness of the screen is adjusted automatically according to the surrounding brightness.

- Tap [ Apps & Widgets] - [ Settings] - [Display] - [Brightness] - [ Automatic brightness] to remove the check mark and disable the automatic brightness setting.

Some points on the screen are not displayed properly.

You may see tiny black points on the LCD screen on rare occasions. This does not indicate a malfunction [\[Details\]](#).

A Bluetooth(R) device was not found.

Make sure the Bluetooth function of your tablet device is turned on.

- Tap [⋮] Apps & Widgets] - [⚙️ Settings] - [Bluetooth], and then set [Bluetooth] to [ON].

Make sure the Bluetooth device you are pairing with is turned on.

When you tap [⋮] Apps & Widgets] - [⚙️ Settings] - [Bluetooth] and then tap [SEARCH FOR DEVICES] at the top right of the screen, a Bluetooth device may not be found immediately. Possible reasons are the number of devices around your tablet device, the distance from the device, the environment, and signal conditions.

- Bring the Bluetooth device you are pairing with as close to your tablet device as possible, and try again.

Make sure the Bluetooth device your are pairing with is in discoverable mode.

- The Bluetooth function of the commercially available Bluetooth device you are pairing with should be turned on and should be in discoverable mode.
- When you reconnect a disconnected Bluetooth device that was previously connected to your tablet device, connect the Bluetooth device again after deleting registration by both the Bluetooth device and the tablet device.

Your tablet device becomes slow or is not performing as expected.

Your tablet device may slow down when you use it in a hot or cold environment. Use the tablet device in a place with a suitable temperature as much as possible.

If your tablet device becomes slow or is not performing as expected, it may perform better if you turn it off once and then turn it back on.

If your tablet device's data storage area is full, this may cause your tablet device not to perform as expected.

- Uninstall any unnecessary applications.

Your tablet device does not work.

Press and hold the power button for about 10 seconds to force it to turn off, and then turn it on again [\[Details\]](#).

Contact the service/support center named in the warranty if this does not solve the problem.

Your tablet device needs to be reset.

Tap [ Apps & Widgets] - [ Settings] - [Backup & reset] - [Factory data reset], and then tap [Reset tablet] at the bottom of the menu on the right.

- All data in the data storage area is deleted, including the Google account information, the system data and settings, and any application data you have downloaded.
- It is recommended that you make a backup copy of important data because the user data cannot be restored after being deleted.
- The tablet device restarts automatically.

The sound from the speaker is distorted.

Adjust the playback volume.

Make sure the tablet device is sufficiently charged.

If the sound effects are turned off, the sound might improve.

Tap [ Apps & Widgets] - [ Settings] - [Sound] - [Sound enhancements] - [Settings] - [xLOUD(TM)] or [Clear Phase(TM)] to remove the check mark from the box for that setting.

The screen brightness is not stable.

When you set the screen brightness to adjust automatically, the screen brightness will adjust according to the surrounding light.

- Tap [ Apps & Widgets] - [ Settings] - [Display] - [Brightness] - [Automatic brightness] to remove the check mark and disable the automatic brightness setting.

The screen brightness cannot be adjusted.

When the screen brightness is set to adjust automatically, you cannot adjust the screen brightness manually.

- Tap [ Apps & Widgets] - [ Settings] - [Display] - [Brightness] - [Automatic brightness] to remove the check mark and disable the automatic brightness setting.

The screen brightness does not adjust automatically as expected.

When you set the screen brightness to adjust automatically, the screen will not darken once it gets brighter. This does not indicate a malfunction. Brightness returns to normal when you press the power button to turn off the screen (switch to sleep mode) and press it again to turn the screen back on.

The screen disappears/darkens unexpectedly.

The screen goes to sleep automatically after a certain period of time to reduce battery consumption.

- The screen turns on again when you push the power button.
- When you want to change the time before the screen goes to sleep, tap [ Apps & Widgets] - [ Settings] - [Display] - [Sleep] in that order to set the time.
- If you set the time to a longer interval before going to sleep, the battery will be consumed faster.

The touch screen does not work as expected.

Make sure you are using the touch screen correctly [\[Details\]](#).

If the touch screen is damaged (scratched, etc.), contact the service/support center named in the warranty.

If the touch screen does not work, turn off your tablet device, and then turn it on again.

- If you cannot turn off your tablet device, press and hold the power button for about 10 seconds to force it to turn off, and then turn it on again [\[Details\]](#).

The date and time are reset.

When the remaining battery power is extremely low, the date and time might be reset.

- Charge the battery, and then set the date and time again.

You want to turn off the tap sound (operation sound).

Tap [ Apps & Widgets] - [ Settings] - [Sound] - [Touch sounds] to remove the check mark and disable the tap sound.

Press and hold the VOL – (Volume) button of your tablet device until the volume indicator displayed on the screen minimizes and the icon reverses.

The screen does not rotate when you turn your tablet device.

Some applications may not support screen rotation. This does not indicate a malfunction.

You want to turn off screen rotation.

Tap [ Apps & Widgets] - [ Settings] - [Display] - [Auto-rotate screen] to remove the check mark and turn off screen rotation.

You want to deactivate the lock screen function/use your tablet device without locking the screen.

Tap [ Apps & Widgets] - [ Settings] - [Security] - [Screen lock], then tap [None] to deactivate the lock function.

The sound from the built-in speaker is interrupted when the screen is rotated.

The sound may be interrupted when the screen is rotated while using the built-in speaker. This does not indicate a malfunction.
